[Privacy and Data Management](#)

Andy is a member of the Privacy and Data Management group in our Montréal office. He advises businesses on a wide range of privacy-related issues, including cross-border data transfers, privacy impact assessments, regulatory investigations, and the development of data governance programs. His expertise also extends to legal issues relating to emerging technologies such as artificial intelligence, big data analytics, blockchain, IoT, biometrics, and advertising technology (“adtech”).

Andy has authored and contributed to various publications on privacy, cybersecurity and technology law, including articles in the *Canadian Privacy Law Review* and contributions to books such as *Managing Privacy in a Connected World* (LexisNexis, 2020) and *The Protection of Personal Information in the Private Sector in Quebec: Looking Back and Thinking Forward* (Yvon Blais, 2020). Previously, he was co-chair of Start Proud Montréal, a non-profit organization that supports the development of students and young professionals from the LGBTQ+ community.
